

I understand FCC is considering a challenge to NJ's Do Not Call law.

I appreciate the subtle difference between the Federal and NJ laws, and fully understand the pre-emption tightrope FCC must walk. Notwithstanding, I ask you to let the NJ law stand.

As a former Federal regulator, I know FCC will be able to artfully craft a legally consistent and defensible position to preserve the NJ statute, and in so doing can send a message to the telemarketing bottom feeders that while the Federal legislative process may be up for sale, NJ's isn't.
